NIMBUS 111 PART FIVE

BY JASON WELCH

At the Empire State building
At GLOBAL CHEMICALS offices at the top floor of the EMPIRE STATE BUILDING, Peter Elgin addsputs soda in a tall glass and turns to WOSHAK, reclining on a lemon corderoy three piece sofa, and croses a persian rug to sit oppersite on in a high backed wicker chair
WOSHAK Let's just hope we get a warm reception at the Asylum and all the materials are ready for construction.
ELGIN Yeah I'm ready for some R&R.
WOSHAK And there's going to be another expedition to Nimbus 3 soon, so I hear.
ELGIN I'm sending through a list of all items to be found and collected .
VICE CHANCELLOR MARTIN EMERSON we got more trouble than your you're discontinued lines Peter.
ELGIN They have been busy.
Carol Hughes.Walks along the.Persian rug.And stops us a Yucca plant saying.
CAROL HUGHS READY WHEN YOU ARE BOSS .
They follow Carol out of the Global Chemicals offices.And down a blue and pink corridor.With red pitches evenly spaced on vinyl silk walls.And white strip lights into.a purple travel tube That takes them down to a marble ground floor.And walk through janitors.In Navy blue.Strides in sweatshirts polishing.a maroon marble floor.
WOSHAK takes the lead straight down stone steps and clambers into the driving seat of his CHEVROLETTE convertible .
WOSHAK I'll program the sat NAV for Chicago.
ELGIN Yeah, the Windy City.From there, we can get a Greyhound coach.To Mexico.And then over land to the asylum.
The train pulls into MEXICO STATION and the two global

executives get out , where they meet there escort REBECA HOLDEN .
ELGIN Is that a ring on your finger.
REBECA HOLDEN I thought about keeping my maiden name but Barnes get very drafty and cold .
He made it, Jace.
The drive takes them out of town and they drive along the route till they get to the complex
and are checked in by armed security at the front gate.
ELGIN Stay on your guard Neal as we enter the complex
They are checked in at reception and then go through the MAGLOCK DOOR and into the
LABARINTHIAN DOMAIN, where the lights are dim along a central walkway. On the wall next to the entrance is a floor plan with sections in different colors.
ELGIN I see they have added a new wing since i was last hear.
LISA DUNLOP There are 500 residence in the ASULUM Peter controlled by three OVERLORDS,
ELGIN Has special equipment I ordered arrived yet
REBECA HOLDEN yes everything setup up.ie got construction Crews waiting even subcontractors
WOSHAK subcontractors that's handy
LISA DUNLOP Steven Taylor is our chief coordinator this season
They walk along a red and white corridor and then enter a blue and pink lift then decend to the throne room where all the residence are waiting in the large cavern with chambermaids cooks and ancillary staff sit on resin chairs around the side waiting for morning assembly, with a high arch ceiling and a raised stage on the the far side .
ELGIN you like it here now IT'S THE global executives retirement home
STEVEN TAYLOR is on the raised platform with Mark Greenstreet s head
of security THEY WALK ALONG THE RED TWIN PILE AXMINSTER CARPET TO THE STAGE
STEVEN TAYLOR Welcome Peter Elgin
ELGIN Thank you chairman great to be here again sorry I'm late the buses from Chigwell were full up nice to see you again .
STEVEN TAYLOR We Stand ready to assist you .All our residents have been watching the news waiting for you .
ELGIN Yes that's very much why we're here

STEVEN TAYLOR Mark here will organise your assistance But I have some standing news for you .

PETER ELGIN walks down a RED and hall adorned with prints of variety artists, ambling along from comedy theaters, and strolls casually in a club style through double doors of the assembly hall.

R etired hotel managers are waiting next to EAST GERMAN army officers for morning assembly.

PETER ELGIN Sorry I'm late, The buses from Chingford failed to arrive and flights were canceled due to CORONAVIRUS .

ONE OF THE ANCILLARY STAFF GETS UP FROM THE RESIN BENCHES AT THE SIDE AND SHOWS HIM TO HIS SEAT AT THE FRONT OF THE ASSEMBLY .

MARK GREENSTREET the ASYLUM WELCOMES YOU, in the spirit of trade and cooperation .

STEVEN TAYLOR N ow that we've rescue the civilians from NIMBUS 111 and done a full inventory of the materials that were taken from your base in VELESWALA.

PETER ELGIN T he military are determined to send captured rutan back to NIMBUS 111 there home planet ,and i hope you've all seen the Documentary of the gallant rescue of civilians trapped on Nimbus 3.

STEVEN TAYLOR YEAH WE'RE ALL REALLY impressed with your gallant rescue of all the men women and children .

CAPTAIN CHAMBERS Sorry i'm late it was a long journey back from VENESWALA.

ONE OF THE ANCILLARY STAFF GETS UP FROM THE RESIN BENCHES AT THE SIDE AND SHOWS HIM TO HIS SEAT AT THE FRONT OF THE ASSEMBLY .

CAPTAIN CHAMBERS And we risked our lives when engaging DRACONIAN HYBRIDS that defended NIMBUS CITY.

STEVEN TAYLOR Your owed a debt of gratitude .

CAPTAIN CHAMBERS My troops are here to escort the first batch of zaroff's new wonderful hybrid .

MAJOR BARCLETTE The construction workers are going to make a habitat for them to the left of the rolling road that leads us to NIMBUS CITY.

CAPTAIN CHAMBERS And escort the new ambassador to the galactic federation for his first head to head with the ruton gestalt and there new leader alpha ,who tried to prevent us rescuing the civilians.

From stage left HANS ZAROV walks past a sandy yellow velvet curtain and over a persian rug to a wooden lecturn, while a nurse dims the lights and activates a monitor that descends from the vaulted ceiling above the stage .

GREENSTREET OUR SCIENTIFIC ADVISOR HAS A DEMONSTRATION .

From the side of the stage a man in a white lab coat enters the auditorium
CHIEF SCIENTIST ZAROV We have constructed a containment area in the Mojave Desert
MARK GREENSTREET I'VE been in contact with the council of KALDOR and confirm climate and conditions are similar to their home planet .
STEVEN TAYLOR Rebecca have you got that inventory
REBECCA HOLDEN yes I have it here
ELGIN if I can give to you The designs for the particle accelerator and the console Mark I'll see what CHIEF SCIENTIST ZAROV has to show me .
Elgin is let down a side corridor decorated with Prints sports stars and veterans of the asylum to the science wing
CHIEF SCIENTIST HANS ZAROV The army has RUTONS in a temporary camp in the Mojave Desert , THEY'VE ERECTED a perimeter fence and grouped them together from where they where captured .
ELGIN At leased the trackers iv'e imported from PANARAMA CHEMICALS are working to find them .

WOSHAK They're using old fashioned hypnotherapy and David Sullivans patented brainwashing technique to revert them back to their natural state using the message just covered by zebra squad in England .
CHIEF SCIENTIST ZAROV I've managed to get specimens to experiment on and there being prepared in my laboratory, if you'll follow me
THEY WALK DOWN A WIDE corridor TO A LARGE HEXAGONAL CHAMBER
WOSHAK So this is where your conducting your experiments .
CHIEF SCIENTIST ZAROV With these berthing Chambers we create a reaction
which accelerates cell growth and I can inject the genes of other species into them at the same time .
They walk into a crisp White Room with lab technicians in blue boiler suits connecting cables to of a plastic crib wear giant squid like beings are inside
CHIEF SCIENTIST ZAROV We can measure the reaction on this console Julie can you start the operation
Julie Newmar [white lab coat, shear green stockings and high heels]Get up a step ladder onto a gantry and starts a saline drip above the birthing chamber then take steps down and takes a syringe and injects the large green squid as one of the lab assistants turns on the power connected to the crib.
They crown around a console and watch as a hybrid animal takes form in the birthing chamber .As the cycle reaches fever pitch a medium sized brown bear replaces the giant squid in the birthing chamber
CHIEF SCIENTIST ZAROV WELL I'LL BE A MONKEY'S UNCLE
PETER ELGIN that's Incredible
MARK GREENSTREET With respect, Minister, there are some more pressing matters.Like the, triumphant return to Nimbus 3 with Results of these great experiments.

ELGIN I belive we're wanted in the assembly room of the asylum for an update, be ready for NIMBUS 3.

HANS ZAROV yeah PACK YOUR TOOTHBRUSH AND WHATEVER .

They leave the science wing along along a red and white corridor,

past prints with brass frames fixed to the walls of managers and retired colonels and through the assembly seated at lime green velvet chairs leading up to a stage with a sandy yellow velvet curtain behind it below a lime green vaulted dome .

HANS ZAROV Sorry I'm late.Had a last minute transformation in the birthing Chamber of the science wing.

STEVEN TAYLOR walks over a persian rug to a wooden lecturing as A MONITOR SCREEN DESCENDS IN FRONT OF THE SANDY YELLOW VELVET CURTAIN and one of the ancillary staff [white cotton costume] goes over to the beige vinyl silk walls and dims the lights .

STEVEN TAYLOR Weather to give our findings and research data to the galactic Federation.

HANS ZAROV To give the research for my new cloning technique would be a radical alteration to the timeline.

PETER ELGIN With all those different species making up the galactic Federation that would make them all powerful.

STEVEN TAYLOR Much better to keep our new cloning techniques for ourselves .

The screensaver is replaced by PRESIDENT VANNESSA BELLAMY of the GALACTIC FEDERATION.

PRESIDENT VANESSA BELAMY .I've been speaking to commander to STYKE of the Sontaran Empire ,Who refuses to let the rUTONS join in fear that his bloodline will be subverted.

OLIVER MOSS For the benefit of the assembly, this Sontarians are clone race already.

PRESIDENT VANESSA BELAMY Thank you.

STEVEN TAYLOR If we can save the science lesson for a more precipitous time, are we all going to get to the Mojave Desert?

CAPTAIN CHAMBERS And then zebra squad will escort technicians through the dimension Gate using the Sunday Times

colour supplement to arrive on Nimbus 3 with the hybrid animals.

JULIE NUMAR Reptiles ,Iguanas, Crocodiles, Alligators, and Giant Tortoises.

SARGENT PALMER Oh behave.

Stephen Taylor steps off the stage and walks over to a fire exit to the right of a sandy yellow velvet curtain and pushes the emergency door open, letting in morning sunshine and a cool breeze .

STEVEN TAYLOR IF YOU'LL ALL FOLLOW .

ZAROV gets up from the stage follows Zebra squad officers and technicians past a sandy yellow velvet curtain and anto the wood laminated and out the fire exit of the assembly room, into the car park .

They walk through the asylum car park then let ZEBRA SQUAD escort them across the highway to a dirt road running into the MOHVI DESSERT .

CORPORAL GREENactivates the 8 ft wide rolling road that vibrates with power and HANS ZAROV alights with his technicians followed by soldiers in there green uniform with lime green arm and shoulder patches . All the soldiers and technicians step up onto the rolling road , hang on to hand rails as the rolling road accelerated through open country, past a panorama of stone hills towards the holding zone and DIMENSION GATE .

PETER ELGIN I managed to procure another batch of eight foot rolling roads which are really efficient.

SARGENT PALMER Oh and why's that ?

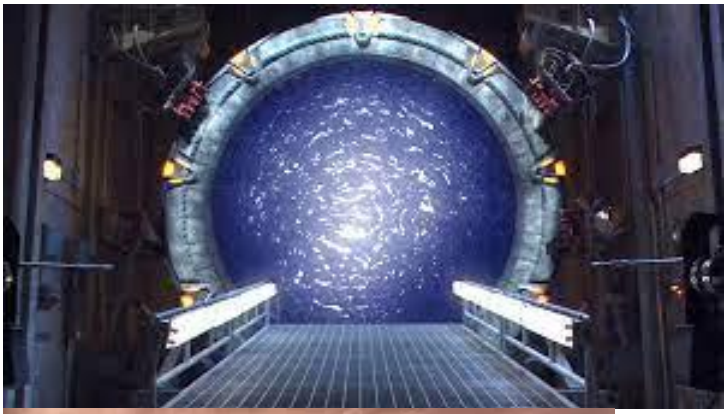
ELGIN .Because the downward gradient creates momentum and they need less power for the incline The rolling roads can go in four directions and eventually they'll be more than one layer so a package can be slotted into any compartment using a barcode system.

Julie numar Are we nearly there yet?

CAPTAIN CHAMBERS Just over the next sand dune, Julie.

Ahead of them the rolling road intersects another one at a tea junction and pushes a palette towards the dimension gate.Soldiers are deposited behind it .

CAPTAIN CHAMBERS All those coming to NIMBUS 111.Be ready, I'm about to activate the dimension gate.



Julie Newmar and some of the technicians walk down metal steps by the side , and over a dirt track to a viewing gallery as the DIMENSION GATE activates, two vertical 20ft arcs rotate 40 degrees creating a rippling mercury pool in the center .

Zebra squad soldiers in there lime green army fatigues with forrest green fabric arm and shoulder patches followed by construction workers in navy blue strides and sweatshirts walk through either side of the conveyor belt and fan out taking up defensive positions as the conveyor belt ejects cages of hybrid animals.

The rolling road is activated and trundles through the DIMENSION GATE, and stops the otherside .Hans ZAROV James Swift and Peter Elgin walked down a metal ladder and enter a builders hut surrounded by a high wire fence enclosing a valley.

CAPTAIN CHAMBERS Senior technicians disembark now and the construction Crews will come with us to start building and enclosure halfway along towards NIMBUS City .

Sergeant Palmer activates a remote control sending the Rolling Road Upper steep Sandbank ,over the crest then sliding down towards Nimbus City .

The dimension Gates reactivate and a large group of KALDOR POLICE, in there blood red costume ,silver moon boots and flowing white cape, followed by the SEYMORE the ruton Ambassador in his TRAVEL CAPSULE ..As he speaks two lights light up on his domed head.

SEYMORE I want to topological analysis of the surrounding area if I'm going to take control.

MAJOR BARKLETTE yeah you tell them SEYMORE

STENTON RELL They're delusions of galactic conquest are over.

A team of KALDOR policeman move on to the rolling road and LAGO activates sending it across the sand dunes towards Nimbus City.

ZEBRA SQUAD soldiers get halfway towards NIMBUS city and start setting up a wire mesh enclosure 20 feet either side, with partitions for each species of hybrid animal .

All plant and machinery taken off rolling road and stored in a temporary holding area and technicians start loading the animals into the new enclosure .

CAPTAIN CHAMBERS Sergeant Palmer secure the area and post-lookouts in case we to get attacked by Draconian hybrids or those BATTLE TANKS we encountered last time .

MAJOR BARCLETTE That's right captain the last time we were here our party was ambushed immediately by RUTON BATTLE TANKS, and we needed ATR'S to blow them up .

CAPTAIN CHAMBERS Also deployed some of your men to help the construction crews .

The construction workers mix cement with sand building Straight Roads outward .

ELSWARE over in the three black domes of NIMBUS CITY, ALPHA ONE is monitoring the KALDOR soldiers as they step down from the conveyor belt and surround the main dome .

ALPHA ONE KALDOR POLICE have come to arrest us .

JARED I must be with my men an escape.

ALPHA The cause of the RUTON is justified we had every right to take over the Galaxy

JARAD That may be so ALPHA but we don't have time the KALDOR POLICE are coming and if I'm not mistaken some of those soldiers from Planet Earth .

ALPHA Activate defensive systems while I go and see ALPHA TWO

ALPHA leaves the main dome on his rubber wheels and goes out into the blind heart desert, then activates a conveyor belt to take him over to the science dome . He glides down a spiral ramp to the base we're Alpha 2 has finished converting his last ruton hybrid

ALPHA ONE have you put the mind brain interface of the ruton gestalt onto the subject

ALPHA TWO the human clone has been activated with the mind brain interface

ALPHA ONE Fantastic Take the B45 here and as many as possible and escape the main down

ALPHA TWO Let's hope JARRED and his men can buy us some time .

ALPHA ONE I must go to my sandpool and communicate with my brethren .

He glides up the spiral ramp and out activating a conveyor belt to take him farther out into the dessert sands then glides off the conveyor and takes a slope into the base of the crater as it starts

to meditate with a thousands of RUTON in similar sandpools across the planet the entire planet.

Elsewhere In the main dome JARRED catches up with his number two ROBAR

JARRED ROBAR get all your men and issue then with plasma rifles from the armory , then take a few days supplies and flea from here .

ROBAR My life at your command

JARRED I'll make a stand here by you some time .

robar and his Men leave and the rest of the Draconian and human hybrids take up the defensive positions around the perimeter of the main Dome .

as the KALDOR police disembarked the rolling road JARRED steps out to stand at the top of a ramp leading down to the sand perimeter .

JARRED That's far enough ,me and my men will defend this area .

STENTON RELL Jumps down from the Rolling Road And his men run forward around the perimeter on the main Dome the rest taking up defensive positions behind the rolling road .

STENTON RELL NIMBUS 111 is now in our control, Surrender now And accepted judgments of the galactic Federation .

JARRED We get regular supplies dropped from high altitude and can hold out here indefinitely .

Behind them the rolling road stops and Seymour slides onto the desert sand

STENTON RELL This is the RUTON ambassador here to negotiate in the name of the galactic Federation

SEYMORE Stand down Jared and let me speak to ALPHA ONE to negotiate peace

Seymour is escorted towards the main dome by RELL and LAGO And stop at the foot of the ramp looking up at JARRED

STENTON RELL So you see we have ships patrolling this area and your supplies will run out unless you surrender now .

CASTAN LAGO Hand in your weapons and you'll be treated leniently .

JARRED Throws his gun to RELL and Seymour glides up the ramp entering the large Dome

STENTON RELL MAJOR BARKLETTE I'll leave you in charge of rounding up men here and take statements .

He turns to JARRED by the door

STENTON RELL Show me around JARRED.

RELL and LAGO follow JARRED Into the main dome where SEYMORE is inspecting the command Bay an instrument panel .

CASTAN LAGO I see there are transmitters linked to relays so you can speak to the whole RUTON GESTALT

JARRED walks passed him and activate the communications console .

JARRED Il transmitters are now active for you to talk to your people

SEYMORE The galactic Federation is now in control of this planet and our plans for galactic conquest are over ..you will revert that to your natural state in your sandpools

STENTON RELL That should do it SEYMORE make sure none of my men are attacked going about their duty near the sampools .

Seymour leaves the communication bay and glides towards the exit

SEYMORE Now he I must catch up with ALPHA ONE who's escaped into the desert

JARRED He took a conveyor belt out into the desert and you can follow him . Seymour leaves the main dome and activates a conveyor belt taking him further out into sand dunes in pursuit of ALPHA ONE .As he glides of the end of the conveyor belt he spies ALPHA ONE at the bottom of shallow sandpit and glides down beside him .

ALPHA ONE The transmitters on the main dome and on my casing let me communicate with the whole RUTON GESTALT .

SEYMORE Let them know that we are now quarentined and have to negotiate with the galactic Federation

ALPHA ONE I don't agree with you SEYMORE when we have a higher destiny

SEYMORE We can't keep killing and assimilation federation citizens

ALPHA ONE BBut what we're going to do then

SEYMORE Relax I've talked with PRESIDENT VANESSA BELLAMY and she's given me power to negotiate for all RUTONS .

ALPHA ONE All right Seymour but you know this is a

fertile planet are these soldiers drink too much and they piss everywhere .

SEYMORE let them think that we give in we'll find a home out there amongst the stars and slowly build plans for a second RUTON Empire .

SEYMORE and ALPHA ONE glide up from the crater and onto the conveyor belt which they activate sending them in the direction of NIMBUS City . They glide off a conveyor belt and into the main Dome and are greeted by JARRED , ROBAR and hybrids who have been rounded up by RELL and the KALDOR police.

RELL What are the results of your talk with the RUTON GESTALT.

SEYMORE We have decided to cooperate with all of your demands and hope we can forge trade links for the long-term future .

RELL I'm delighted to hear that you can tell the high council

He walks over to the communication Centre makes a call and a holographic image of PRESIDENT VANESSA BELLAMY, GENERAL WILLIAMS, and CHIEF MOVER POUL appears in the center of the large concave dome .

STENTON RELL MADAM PRESIDENT you'll be pleased to hear that the RUTONS accept SEYMORE as there ambassador and are going to cooperate

CAPTAIN CHAMBERS All the routines that we find will be bought back here some of them reverted that to their natural state And my men can take them back to their sandpools .

RELL The humans of Earth have perfected a cloning technique injecting cells into the cerebellum of the rutons

CAPTAIN CHAMBERS Our chief Scientist back on Earth Can make a RUTON mutate into a hybrid animal without it killing the Host creature .

SEYMORE What you're saying is we may expect a science team to use us in genetic experiments ,

ALPHA ONE this may be our future .

CASTAN LAGO even now my technical section is negotiating for the research

PRESIDENT VANESSA BELLAMY yes we have big plans for the

once we have confirmed cloning experiments on earth we will be conducting further tests .

GENERAL WILLIAMS Eventually you may be full members of the galactic federation.
PRESIDENT VANESSA BELLAMY In the meantime a DRACONIAN BATTLESHIP will soon be patroling NIMBUS with orders to regard all ships in the area as hostile .
GENERAL WILLIAMS Preventing you getting supplies from space traders or any of your spacefaring hybrid .
PRESIDENT VANESSA BELLAMY We thank you CAPTAIN CHAMBERS for securing helping to secure the planet and we'll see you on GALDA PRIME .
CAPTAIN CHAMBERS I must be getting back to my main command at zebra squad England in Central London .
GENERAL WILLIAMS DRACONIAN ships will be arriving soon, they may want to set up another base here to the west of NIMBUS CITY.
ROBAR Yeah I look forward to meeting them .
JACAR I don't want them to get assimilated like us when my ship made an emergency landing .
CHIEF MOVER POUL Give me your needs to maintain a small colony right here .
The holograms wink out of existence and RELL speaks into his risk communicator
STENTON RELL b76 expect us back at the DIMENSION GATE
the KALDOR soldiers alight the rolling road to take them back to the DIMENSION GATE
